

PROXON BRUSH & ROLLER

PROXON BRUSH AND ROLLER
Feature synthetic bristles
and polyester construction
for precise manual applica-
tion, ensuring optimal con-
struction performance.

Why?

Proxon Brush:

- Synthetic bristles for precise application
- Milky white color for visibility
- Lightweight for easy handling

Proxon Roller:

- Polyester bristles for efficient coverage
- 230mm width for optimal application
- Multicolored design for versatility

Where?

Proxon Brush and Roller, ideal for manual coating, enhance efficiency in construction. Versatile tools for touch-ups, repairs, and large surfaces with consistent and precise application.

Shelf Life

The Proxon Brush and Roller, when handled & cleaned appropriately, maintain optimal performance over an extended period. Regular inspections & adherence to safety guidelines contribute to their prolonged shelf life in construction applications.

How to use

Apply coatings with Proxon Brush, featuring synthetic bristles for manual work and a green plastic handle for proper handling. The Proxon Roller, with polyester bristles, offers optimal coverage. Follow safety guidelines, clean both tools thoroughly after each use for prolonged performance.

PROXON BRUSH & ROLLER

Brush's Specifications

Material	synthetic
Colour	Milky white
Width/Breath	100 mm / 100mm
Thickness	15mm
Handle material	plastic
Handle colour	Green
Weight	130 gm aprox.
Thickness	15mm
Country of Origin	India

Roller's Specifications

Material	polyester
Colour	Yellow & Black
Width	230mm
Thickness	40mm
Handle material	plastic
Handle colour	Multicolour
Weight	180 gm aprox.
Country of Origin	India

Safety Measures

Prioritize safety by using Proxon Brush and Roller with appropriate personal protective equipment. Follow safety guidelines for handling, cleaning, and storing the tools. Consult safety labels and guidelines provided by Proxon to ensure a secure working environment in construction applications.
