

## PROXON CG 40

**PROXON CG 40** is a versatile, hand-operated cement grout pump, emphasizing efficiency, affordability, simplicity & durability for construction applications.

### Why?

- Portable design for easy transport
- Silent, pollution-free operation
- 70 PSI high-pressure capabilities
- Reliable for diverse grouting tasks
- User-friendly repair process
- Efficient & affordable construction solution

### Where?

Suitable for diverse environments, including subways, tunnels, reservoirs, & construction joints, the **PROXON CG 40** excels in concrete structures injection work. It addresses hair-line cracks, expansion joints, and site improvements, making it indispensable for upgrading works and concrete construction joints.

### Shelf Life

The **PROXON CG 40** has a commendable shelf life, ensuring long-term reliability. Regular maintenance, including cleaning and proper storage, contributes to preserving its functionality and performance over an extended period.

### How to use?

- To fill voids in or beneath foundations, slabs, concrete structures, Sumps and Basement structures, that typically develop due to erosion, settlement or other failure mechanism
- To fill abandon utilities
- To fill voids in a rock formation at depth, to cut off water or allow for excavation

# PROXON CG 40

## Specifications

Pump Type	Hand Operated Cement grout Pump
Power source	Manual
Material	Cast Iron
Weight	11 KG
Piston speed	40 PSI
Max. Pressure	70 PSI
Air Pressure	4-7 Kgs / cms
Output	7-8 Liters / min
Diaphragm Diameter	60mm
Inlet	¾" Bsp (19mm)
Outlet	¾" Bsp(19mm)
Inlet Hose	0.5 Meters
Outlet Hose	5 Meters
Country of Origin	India

## Safety Measures

Prioritize safety during operation. Wear appropriate protective gear, including gloves and eye protection. Keep the work area well-ventilated. Adhere to recommended pressure limits. Familiarize yourself with emergency shutdown procedures. Follow manufacturer guidelines for a secure and accident-free operation.
